## Profile

To secure a position where I can effectively contribute my skills and abilities to the growth of the organization and build my professional career. I have 1+ years of experience in Front-end developer and management of web on windows-based software applications to manage, test and develop Woo Commerce website on heterogeneous environments.

## Professional Experience

### Front-End Developer (1+years), Byzero Technologies

- Designed UI With JavaScript, HTML5, CSS3, Bootstrap.
- Developed and Maintained Front-End code for 10+ Websites(Re-designs, Updates, Error Fixing).
- Developed and designed static and dynamic websites as per client requirements
- Created and used jQuery form validation with Ajax development.
- Websites are built fully responsive for all the devices while hand over the client.

## Projects

### E-Commerce

- Built a dynamic E-commerce platform with WooCommerce, PHP, and MySQL, enabling users to browse, add products to the cart, and complete secure transactions.
- Developed a static E-commerce website using HTML, CSS, and JavaScript, showcasing products and information about the business.
- Developed a full-fledged E-Commerce-based online store for XYZ Store, selling a wide range of products.
- Sole developer responsible for end-to-end development, including theme customization, plugin integration, and performance optimization.

### Product Landing Page

- Developed a web application using ReactJS, HTML, CSS, and JavaScript to showcase products/services and company information.
- My first project in ReactJS is designed and built from zero [www.sibisteels.com](http://www.sibisteels.com)
- In This React project I used a reusable components for the web application
- Designed a visually appealing user interface and optimized website performance for faster loading.
